DESCRIPTION

The quiet VSF Slim Multi Speed Exhaust Fan with Humidity and Motion Sensor is an IC-rated bath fan suitable for new construction or remodel applications, equipped with a brushless DC motor that delivers powerful energy-efficient airflow. Its contemporary grille design and range of sleek finishes offer versatility for a range of interior styles. A high flow speed of 80, 90, 110, 120, or 140 CFM and a continuous lower speed can be set using switches in the fixture. The humidity sensor can activate high airflow when humidity rises above a level set by the user (50-100%), and a motion sensor activates the fan when someone enters the room. This fan fits in 2 x 6 inch construction, perfect for smaller joist spaces, and can be mounted on a ceiling or wall. It has rust-proof steel motor housing, a built-in backdraft damper and thermal shutoff, and includes articulating expandable anti-vibration brackets and a detachable connector for 4 or 6 inch ducts. UL listed for use in a tub or shower enclosure when GFCI-protected.
