DESCRIPTION

The Counterbalance Plug-in Wall Light seems to defy the laws of physics. Positioned as desired in space, this piece, with its position variation, suggests the dynamic equilibrium of a sculptural mobile. Equipped with a fluid balancing system using gear wheels, the counterweight compensates for the movements of the long arm and ensures stability of the diffuser. Structure in painted steel and head in aluminum in Black finish. Includes step dimmer (0/50/100%).
