Oblique Outdoor Accent Light

By Artemide

Description

Unveil the hidden beauty of your outdoor landscape with the Oblique Outdoor Accent Light, a truly unique fixture inspired by the elegant simplicity of a sprouting plant. Its gracefully ascending form, with a bean sprout-like head, delivers focused, glare-free illumination that highlights your garden's finest features. The clever design of the Oblique Accent Light allows it to subtly recede into its surroundings from certain vantage points, while providing robust structural support and powerful light from others. The protective outer shell artfully embraces the lighting head, securing it while maintaining a streamlined aesthetic. Engineered for precision, the slightly downward angle of the Oblique projects brilliant LED light through a high-performance reflector. This advanced optical system prevents glare and meticulously defines a quiet light zone, making it perfect for accentuating shrubs, sculptures, or architectural elements. Offered in sophisticated Anthracite Grey or crisp White, and including an 8-inch ground spike for easy installation, this accent light is both beautiful and practical, and is a favorite among customers seeking discreet, effective outdoor illumination.

Specifications
