Oblique Outdoor Path Light

By Artemide

Description

Illuminate your pathways with the uniquely organic design of the Oblique Outdoor Path Light. Inspired by the quiet strength of a sprouting plant, this fixture features a slender vertical stem that gracefully extends upward, culminating in a thoughtfully angled lighting head reminiscent of a bean sprout unfurling towards the sun. The ingenious dimensions of the Oblique Path Light allow it to blend seamlessly into your landscape, appearing almost invisible from certain angles while providing robust support and elegant illumination from others. Its outer shell masterfully wraps around the lighting head, ensuring both protection and a refined aesthetic. Engineered for superior performance, the slightly downward angle of the Oblique projects powerful LED light via a high-performance reflector. This innovative design prevents glare, ensuring a comfortable visual experience, and effectively defines a quiet light zone along your paths, gardens, and outdoor features. Available in two versatile heights, the Oblique Path Light offers flexibility for various landscaping needs, providing a reliable and visually pleasing solution for guiding guests and enhancing the beauty of your outdoor oasis.
