DESCRIPTION

Inspired by the shape of a sprouting plant, the Oblique Outdoor Path Light's head pushes up and stretches the vertical stem, just like a bean sprout. The dimensions of the design render the piece nearly invisible from some angles, while providing solid support from others. The outer shell wraps around the lighting head to hold it in place. The slightly downward angle of Oblique projects LED light via a high-performance reflector, preventing glare and defining a quiet light zone. Available in two heights.
