TruTrack is a recessed 24VDC single circuit track that is only as thick as the 5/8 inch drywall, eliminating the concern of hitting studs, and allowing complete flexibility to make turns along the ceiling. Available in 2, 4, 6 and 8 foot length (up to 60 feet), with the ability to be cut at the job site. Constructed of extruded aluminum in power coat White or Black finish. For a complete and clean architectural look, a paintable slot cover is included with TruTrack so only the track head will be visible once installed. Track power feeds available in end, center, L, T and X, sold separately. Designed for use with a 24VDC Universal power supply up to 40 feet away. Universal power supply dimmable with Triac, electronic low voltage (ELV) or 0-10V, sold separately. Required power supply, power feed, dead end(s), track heads, dimmer control, and optional accessories sold separately.
