Ipno Pendant

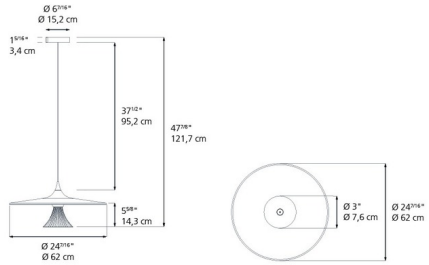

By Artemide

Description

The Ipno Pendant by Artemide is an innovative optical marvel, transforming the delivery of light into a soft, captivating emission through its unique design. This suspension fixture is a sophisticated blend of advanced technology and elegant aesthetics, providing both visual intrigue and precise illumination.At its core, Ipno features an innovative optical unit that precisely directs and concentrates light using a Total Internal Reflection (TIR) principle. Light comes to life as it passes through the material, but crucially, only a minimal, diffused, and beautifully controlled rate of light is emitted into the surrounding environment. The distinguishing spiral-patterned diffuser further enhances this soft emission, creating a mesmerizing visual effect. Available with a sleek Black and Gold finish, the Ipno Pendant adds an undeniable touch of elegance and modern sophistication to any interior, making it a focal point above dining tables, in entryways, or in refined living spaces.
