## BuzziJet Pendant

By BuzziSpace

## Description

With the BuzziJet Pendant, form follows function, offering a simple modern design equipped with acoustic performance. The BuzziJet features a cylindrical silhouette with an upholstered foam core that gives the pendant an airy appearance while allowing sound waves to bounce back-andforth within the radius of its body to mitigate noise. Available in two sizes with a myriad of fabric options. Includes a White powder coated canopy, mounting plate to cover standard US junction box, and a suspension kit that allows you to suspend the BuzziJet with cables together or apart.

Shown in white / mid grey fabric
