BuzziZepp Suspension

By BuzziSpace

Description

Designed by Alain Gilles, the BuzziZepp Suspension offers a striking shield of light equipped with acoustic technology. With its large-scale upholstered shade composed of acoustic panels within a slim frame, the BuzziZepp was conceived as an imaginary island that hovers above to define zones without obstruction and create intimate, peaceful spaces within one that may be larger- such as an office. Available in two sizes with a linear LED suspensions set into a Black powder coated frame and several upholstery options. Small suspension includes four suspension cables and Medium suspension includes six. Acoustic panel may be mounted straight or on a 20 degree angle. UL and cUL listed.
