## Z-Bar Wall Sconce

By Koncept Lighting

### Description

The Z-Bar Wall Sconce features a sleek, minimalist design that can be used in a wide range of applications, whether it be to illuminate a passageway, display artwork, frame a mirror, or simply to be appreciated as its own sculptural element. It features a slim LED light bar that can be mounted horizontally, vertically, or even diagonally to suit your preferences. The bar can also rotate to direct the light in any direction towards or away from the mounting surface. This fixture can be installed on the wall or ceiling. Includes one square and one rectangular mounting plate. Note: This fixture requires space in the junction box to accommodate the transformer. It is recommended that installers use either a 4 inch octagon box or a single gang outlet box that is at least 1 inch deep.
