Saya Pendant By Fabbian

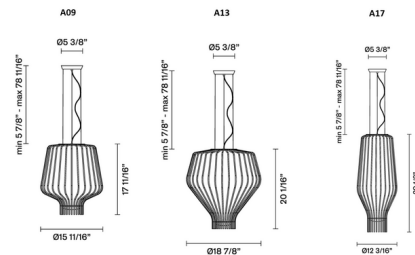

Description

Saya was inspired by the tale of a journey midway between the East and West, where aesthetics and the memory of far-off cultures are combined with Venetian tradition of cage blown glass to form these timeless pendants. Each element of the Saya pendant is hand crafted starting with iron rings forged into a structural cage around the upper and lower bases and then a burnished finish is applied by electroplating. The metal frame is then polished and passed to the expert glass blower.
