Amisol Pendant Structure - Overstock

By Luceplan

Description

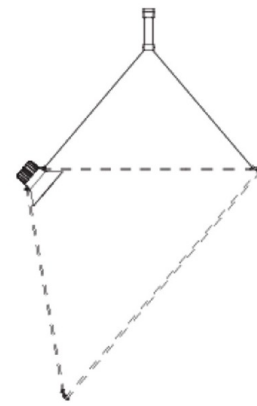

The Amisol pendant structure features thin rods that connect the two main elements, structure and disk, together. Constructed of aluminum in Light Grey finish. Like a solar sail, a powerful 50 watt LED light source projects a beam of light onto the disk, either diffusing or reflecting the light. Disk available in two sizes. By altering the length and connecting points of the two supporting wires the rotation of the disk can be set in any angle. A complete fixture includes a structure and disk sold separately. Optional anti-rotation accessory sold separately. NOTE: This is a discontinued model and limited to quantity on hand.
