## Doble Wall Clock with Double Ring By Nomon

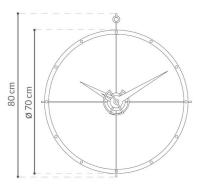

## Description

The Doble Wall Clock with Double Ring is designed to be perfect to give the final touch of decoration in the spaces of your home or workplace. Unlike Nomon's other clocks this one stands out for its different combination of materials colors and shapes. As references for the time signals along the double wooden ring are small cylinders of bright golden color. These create the ideal combination between a dark color a light color and a warm color. Along these rings there are also two lines in gold in the middle to divide and support the clock.

Shown in polished brass
