Discovery Extended Suspension

By Artemide

Description

The Discovery Extended Suspension is based on minimal geometry. A very light aluminum ring houses an LED strip that injects light into a specially worked surface of transparent PMMA. The diffuser is composed of a perfectly transparent PMMA surface, processed with micro-particles so small that the surface is hardly perceptible when the fixture is turned off. When the fixture is turned on, the transparent interior appears to fill with light as if by magic. This unique result is obtained through Discovery's direct and indirect emissions, which produce an embracing and uniform light. Their geometry and layout are calculated to obtain constant emission throughout the surface. Integrated 49.3 watt 120 volt LED light source. Dimmable via 2-wire dimming. UL listed.
