**DESCRIPTION**

Series 28 is an exploration of specificity in manufacturing. Instead of designing form itself, the intent was to design a system of making that yields form. Individual 28 forms result from a complex glass-blowing technique whereby air pressure is intermittently introduced into and then removed from a glass matrix which is intermittently heated and then rapidly cooled. The result is a distorted spherical shape with a composed collection of imploded inner shapes, one of which acts as a shade for the light source. Available with 1.5W LED or 20W Xenon lamping. Choice of three, five, or seven pendants on a round Brushed Nickel or powder-coated White canopy. Each pendant includes 10 feet of adjustable coaxial cable. Bocci recommends mounting power supplies remotely in an easily accessible and hidden location for ease of long-term maintenance as well as providing a robust 5/8 inch plywood backing in the ceiling for secure installation.
