BRAND Bocci

DESCRIPTION

Series 28 is an exploration of specificity in manufacturing. Instead of designing form itself, the intent was to design a system of making that yields form. Individual 28 forms result from a complex glass-blowing technique whereby air pressure is intermittently introduced into and then removed from a glass matrix which is intermittently heated and then rapidly cooled. Each sphere contains an interior landscape of satellite shapes, including an opaque milk glass diffuser that houses the light source. Available with 1.5W LED or 20W Xenon lamping. Includes 120 inch adjustable coax cables allowing pendant lengths to be set on site. Made in North America. UL and CE listed. Bocci recommends mounting power supplies remotely in an easily accessible and hidden location for ease of long-term maintenance as well as providing a robust 5/8 inch plywood backing in the ceiling for secure installation.
