Moonlight Sonata Wall Sconce

By John-Richard

Description

The Moonlight Sonata Wall Sconce brings glitz and glamour to your interior space. A natural Selenite Crystal panel is complemented by a Polished Stainless Steel or Antique Brass finish. Selenite is a natural crystalline material with wide decorative appeal. By its sheer nature, imperfections such as other mineral deposits, which may appear as colored sections or varying crystalline structure, are not only expected, but indeed add to the beauty of the piece. The softness of selenite may result in separation of sections of crystal, which can be reattached with the use of a clear adhesive.

Shown in antique brass / selenite
