Big Ass Fans

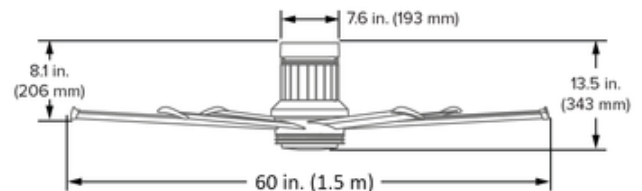

DESCRIPTION

The i6 Flush Outdoor Ceiling Fan combines the power and efficiency of industrial fans with a fleet of smart features and a refined modern style that looks amazing in homes, restaurants, retail spaces and public venues. Its brushless DC motor and premium aircraft-grade aluminum airfoils (blades) deliver virtually silent, energy-efficient airflow. This fan is designed for use in covered outdoor settings. Maintaining the comfort of your space is a breeze, thanks to the built-in SenseME system of on-board sensors and controls. The fan can turn on or off based on room occupancy detected by a motion sensor, and temperature and humidity sensors detect environmental changes to automatically fine-tune fan operation and maintain your comfort level. The included bluetooth remote control enables fan speed adjustment (7 speeds) and motor on/off. It can be hand-held, placed in a magnetic wall holder, or fixed in a wall mount. The mount and holder are included. The free Big Ass Fans app offers additional control functions such as scheduling, grouping fans and Whoosh (breeze) mode. The i6 also integrates with smart home systems for voice control including Amazon Alexa, Google Assistant, and ecobee. With its world-class airflow and modern features, the i6 smart fan is an excellent solution for refreshing your space. Optional accessories are sold separately. Note: Requires a junction box rated for fan support of 70 lb.
