Coordinates Floor Lamp By FLOS

Description

Make a bold yet minimal statement with the Flos Coordinates F Floor Lamp, a captivating design that transcends conventional lighting to become a luminous architectural element. This striking lamp features two vertical LED bars standing gracefully on a simple round base, creating a powerful visual presence in any contemporary space. Each element is meticulously crafted from extruded anodized aluminum and fitted with an integrated LED strip diffused by platinum optical silicone, ensuring a smooth, consistent glow. What truly sets the Coordinates F apart is its customizable nature: the vertical bars can be rotated in different directions during assembly, allowing you to personalize the light direction to suit your specific needs or aesthetic vision. Control is intuitive and versatile; a push button on the cord offers quick adjustments to 100% or 50% brightness, or off, while a long press enables continuous dimming from 100% down to a subtle 10%. This unique blend of sculptural form, customizable light, and advanced dimming capabilities makes the Coordinates F an exceptional choice for modern interiors.
