Poldina Rechargeable Wall Sconce By Zafferano America

Description

The Poldina Wall Sconce features a classic sconce design with modern functionality. The curved arm supports a tapered shade that houses an integrated LED light source with a portable, rechargeable battery. The lamp head may be removed from the bracket arm for charging with included USB cable. Poldina's portable nature allows it to be easily mounted and repositioned for any situation without the need for complex rewiring. Complete, assembled fixture (lamp head and bracket arm) is suitable for indoor/outdoor (IP54) location use. The lamp's color temperature can be switched between 2200K, 2700K and 3000K (234-251-256 lumens). Touch dimmer. 10 hour battery life. Charging time approximately 6-8 hours. The lamp head may be used on its own without the bracket arm, but is suitable only for indoor use in this configuration. The magnetic head can be removed from the body to allow for convenient charging with included charging base.
